

Development Grant Program Series

2012-2024

The Center for Faculty Excellence Faculty Development Grant Program has provided \$457,988 to many faculty and staff, who have encouraged and facilitated the development and creation of findings relevant to the assessment of student learning, the Scholarship of Teaching and Learning, or research relevant to institutional research, assessment, teaching and learning, and accreditation for over 20 years. What has remained constant is the annual programming designed to enhance student learning, promote the scholarship of teaching and learning, and facilitate institution-wide understanding of effective teaching.

Grant Program Goal/Purpose: The goal of the Grant Program is to encourage and facilitate the development and creation of findings relevant to the assessment of student learning, the Scholarship of Teaching and Learning, or research relevant to teaching and learning. The purpose of this grant program is to provide "seed money" for a work in its early stages, developing a Scholarship of Teaching and Learning (SoTL) project, and/or designing faculty development initiatives to achieve advancements in student learning.

Call for Proposals 2024-2025:

Eligibility: Grants, of \$500 - \$2000, are awarded competitively to fund projects led by benefit-eligible faculty or professional staff members or collaborative teams. Examples of suitable projects for funding include (a descriptive, but not inclusive list):

- Study of the impact of interdisciplinary, service-learning, experiential, digital, etc., teaching strategies on student learning.
- Design faculty development initiatives to achieve advancements in student learning.
- Studies of digital and face-to-face venues on (parity of) student learning outcomes.
- Research support for the analysis of student learning outcome data (e.g., course-, program- or college/school-level assessment), particularly as it is used to modify teaching and learning activities.
- Development of rubrics to assess student learning in or across a variety of teaching sites (i.e., classroom, clinic, service-learning site, on-line instruction).
- Other proposal focus.

Criteria for Selection: Proposals will be reviewed and evaluated according to the following criteria:

- Able to lead to significant, positive changes in student learning.
- Likelihood that the project will be successfully completed.
- Likelihood that the project will advance the department's or the unit's pedagogy, curricular or assessment efforts.
- Sustainability of results beyond the funding period.

Expectations for Recipients:

- All recipients must provide a brief, progress report of their project, detailing products and actions resulting from their work. The report will be due on May 20, 2022.
- All recipients must publicly share their product in an appropriate venue; unless another venue is identified, it will be assumed that you will commit to an on-campus research presentation/poster session, or other suitable venue, scheduled for 2022-2023.

Procedures to Submit Grant Proposal:

A title page clearly indicating:

- A project title.
- A short (fewer than 200 words) project abstract suitable for public distribution if the project is funded.
- Names and contact information for all project participants/investigators. Identify the principal investigator.

The proposal body indicating:

- A statement of purpose, describing how the project will help meet departmental, college/unit, or university goals, **and** how student learning will ultimately improve as a result of the project.
- A project design describing what will be done.
- A timeline for completion of the project.
- The expected product(s) of the project.
- A discussion of the sustainability of the project after the end of the funding period.

Budget information indicating:

- > Amount requested (between \$500-\$2000)
- > Detailed description, justification, and cost of each requested budgeted item.
 - ELIGIBLE budget items: Student research assistants, equipment, books, resources directly related to and focus on the grant work.
 - EXCLUDED: Grants will NOT replace lost faculty salary/clinic revenue, nor will they fund faculty travel/conferences (presentation of results), general office supplies, and print materials.
- > Inquiry on this grant proposal concurrently under review with another grant (in whole or in part) sponsor, please identify all areas of overlap between grant applications.
- > Status of human subjects/vertebrate animals.
- > Status of IRB for project.
- > Signatures of responsibility & Department/Chair approvals

Grant recipients commit to publicly share their research to on-campus presentations designed to familiarize the campus with the grant recipients and their projects.

Academic Year: 2024-2025

The Center for Faculty Excellence announced the recipients of the 2024 Faculty Development Grants for the Assessment of Student Learning/Scholarship of Teaching and Learning. The CFE Development Grant Program provides "seed" money for award recipients' work in its early stages that advances the assessment of student learning or develops a Scholarship of Teaching and Learning (SoTL) project. Nine teaching/research teams, including 25 faculty and 2 staff, were awarded the 2024-2025 Faculty Development Grants and presented in the Spring 2025.

Academic Year: 2019-2020

New presentation of grants introduced, a dynamic, fast-paced “lightening rounds” program, which participants move from table to table and glean grant highlights, grant discoveries, findings, challenges, successes, milestones, and next steps. The 90-minute program will allow for each grant a 12-minute table presentation 4 times. Grant programming for 2019-2020 was to be held in April 2020. However, due to the Conornavirus (COVID-19) pandemic, the programs were cancelled.
