

The goal of this research is to learn about the relationships between self-reported walking ability, cognitive performance, and fatigue in individuals with multiple sclerosis.

You may qualify if you:

1. Age 18-64 years
2. Have a diagnosis of MS
3. Are able to walk at least 100 meters without a device (e.g., walker, cane)

You should not be in this study if you:

1. Have a neurological diagnoses beyond MS
2. Pain limiting your walking ability
3. Currently experiencing an MS-related exacerbation

The study requires one virtual assessment (~1 hour).
